DESCRIPTIONS>70 BODY >7010 PASSENGER COMPARTMENT REA...>INTRODUCTION - PASSENGER COMPARTMENT REAR SIDE DOORS

MUSA

1.4 16v
da 10/04

Technical Data
Descriptions
Fault diagnosis
Test
Procedures
Electrical equipment

The front doors have been designed and constructed in such a way as to guarantee active safety for the occupants (without sharp edges, built-in armrest, high quality materials) and protection against break ins (locks and control linkage protected against break in). The rear doors also feature a Carrier which, in addition to supporting the electric window motor, guides and various cables, is integrated with the actual door and performs a structural function. The rear doors, on some versions, may be fitted with electric windows and anti-crush safety seals.

Like the front doors, the rear doors are one of the strong points of the accessibility of the IDEA with dimensional features that, in effect, place the vehicle at the top of its category; the concept of accessibility is taken to new heights, given the space involved, you do not get in and out of the IDEA, you enter it or leave it.

- 1 - Door inner panel
- 2 - Carrier
- 3 - Electric window guide (for versions where fitted)
- 4 - Opening mechanism Bowden cable
- 5 - Anti-crush safety seal (only on versions where fitted)
- 6 - Window
- 7 - Door control buttons
- 8 - Check strap
- 9 - Interior door opening handle
- 10 - Electric window motor (for versions where fitted)
- 11 - Lock
